

Insure Your Patient's Privacy!

We know that meeting HIPAA standards for insuring the patient's privacy is just as important in the pharmacy as it is in the doctor's office. The Pharmacy Pick-Up Log will help fulfill this responsibility. The 2-part carbonless Prescription Pick-Up Log not only eliminates carbons, it also keeps the patient's name private. Part 1 is a series of numbered labels. As each line is filled, the label can be transferred to Part 2. The next patient sees only blank spaces, not the previous patient's information. At the end of the day, just remove the bottom sheet and have a complete listing of prescription pick-ups for the day.

889101 - Prescription Pick-Up Log

Cat. No.	Pts.	Wt. per 1000	Imprinted Lot Prices				
			250	500	1000	5000	10000
